**Dr.Frank J.Milnar Studies Composite Resins With Italian World Master**

Dr.Frank J.Milnar was invited to study with Dr.Lorenzo Vanini at his educational facility in Albergo Lenno, Italy on July 24 & 25, 2009. His colleagues and peers recognize Dr.Vanini as a world's master in conservative dentistry and composite art.

Mycerium,Inc., an Italian manufacturer of Dr.Vanini's composites and Optident, Inc., which distributes Mycerium products in the USA, invited Dr.Milnar to learn and gain hands on experience with Dr.Vanini in his Direct Masterclass. Dr.Vanini has spent 15 years developing his own composites that use only the best materials to mimic nature.

Knowing of Dr.Milnar's reputation as a skilled clinician,educator and publisher, Mycerium and Dr.Vanini were searching for someone to teach Dr. Vanini's color theories and exquisite composite art in the USA. Dr.Milnar has been selected to teach and train other dental professionals, both nationally and internationally with Dr.Vanini's products.

Dr.Milnar has asked Dr.Vanini to lecture and give hands on workshops at American Academy of Cosmetic Dentistry's 2010 Scientific Session in Grapevine Texas..Dr. Vanini has asked Dr.Milnar to assist him with his workshops at this meeting.

For more information on Dr. Frank J. Milnar or Killian, Milnar & Associates visit their website at [www.stpaulsmiles.com](http://www.stpaulsmiles.com) or call 651,645.6111.
