A Hands on Workshop: Creating a Life-Like Composite Veneer

Course Instructor: Frank J. Milnar DDS, AAACD

Course Synopsis

This course is designed for clinicians seeking to improve their skills in order to confidently restore composite veneer cases, from simple to complex. Layering techniques taught in the course will enable the participants to create life-like esthetically pleasing restorations. Polishing and finishing techniques will be reviewed in detail and a step-by-step procedural approach to solving daily anterior challenges will be presented.

By developing the power to observe, understanding tooth morphology, and having a thorough knowledge of color and the relationship between the optical properties of light and a restoration, the clinician can become artistic in their composite restorations.

Course Objectives

- Increase confidence when restoring composite veneer cases by utilizing predictable methods
- Understanding of layering techniques required to produce natural aesthetics
- Exploring various finishing and polishing techniques for creating natural aesthetics
- Learn how to create “Realism” in you’re your composite restorations
